Mimarinin geleceğini **bugünden tasarlıyoruz.**

Kaiser Grand, dış mekân sistemlerinde estetik, teknoloji ve dayanıklılığı bir araya getiren yenilikçi bir yapı markasıdır.

Pergola, bioklimatik sistemler, cam tavan, giyotin cam, sürme cam, zip perde, motorlu rüzgâr kırıcı, Wintend ve bahçe çit sistemleri başta olmak üzere yaşam alanlarını dört mevsim kullanılabilir hâle getiren premium çözümler sunuyoruz.

Keşif, projelendirme, üretim, montaj ve satış sonrası destek süreçlerini tek merkezden yönetiyor; her projeyi mimariye, kullanım amacına ve müşterimizin beklentilerine özel olarak ele alıyoruz.

Sadece sistem değil,**yaşam alanı tasarlıyoruz.**

Kalite,fonksiyonellikvemodernmimariyibirarayagetirerek uzun yıllar güvenle kullanılabilecek özel çözümler geliştiriyoruz.

GRAND

GİYOTİN SİSTEM
GUILLOTINE SYSTEM

TASARIM VE FONKSİYONELLİK

- Kaiser Grand Giyotin Cam Sistemleri, 8mm temperli (kırılmaya dayanıklı) veya ısıcam panellerin motor yardımıyla yukarı/aşağı hareket etmesiyle, panoramik görüş açısı ve gün ışığının içeri girmesiyle doğal aydınlatma sağlar.
- RTS teknolojisi kullanan giyotin sistem motoru uzaktan kumanda ile çalışır ve start-stop teknolojisi sayesinde hareket istenildiği noktada durdurulabilir.
- Sistemin tamamı veya tek bir modülü uzaktan kumanda ile çalıştırılabilir.
- Estetiği ve görüş alanını minimum oranda etkileyen cam profilleri, kullanıcıların görüş alanını engellemez ve sınırsız renk,ahşap kaplama ve desen seçenekleri ile dış ortam ile kusursuz bir bütünlük sağlar.
- Sisteme eklenebilen yağmur ve rüzgâr sensörleri, sistem açık durumdayken yağış ve fırtına gibi durumları algılar ve otomatik kapanır.
- Giyotin sistemler % 60 oranında ses yalıtımı sağlamakta, ısıcamlı sistemlerde kullanılabilen sinerji ve konfor camlar ile ısı yalıtım özelliği daha da üst seviyelere çıkarılabilmektedir.
- Akılı ev sistemleri ile uyumlu çalışmaktadır.
- Giyotin sistemlerimiz; ses, rüzgâr ve yalıtım testleri bağımsız kuruluşlarca yapılmış olup, Avrupa standartlarında sertifi kalara sahiptir. Isıcamlı sistem, 8mm standart cama göre enerji tasarrufu, rüzgâr dayanımı ve su sızdırmazlık özelliği daha yüksektir.
- Vasistaslı cam opsiyonu, yüksek katlarda cam panellerin dışarından temizleme imkanı sunar. Ayrıca sistem kapalıyken vasistaslı kanat açılabilir ve ortam havalandırılabilir.

GÜVENLİK

- Sistem kapatılırken cam paneller arasında parmak sıkışması önlenmiştir. Sistem açılırken ise motor alt limiti, hareketli camla sabit cam arasında 1-2 cm boşluk olacak şekilde ayarlanarak park pozisyonunda bile sıkışma tehlikesi engellenmiş olur.
- Çelik zincirli giyotin (opsiyonel) sistem diğer uygulama tiplerine göre daha fazla güvenlik sağlar.
- Teras uygulamalarında giyotin sistemi, pencere özelliğinin yanı sıra toplanma sırasında %100 emniyetli cam korkuluk görevi de yapar.
- Özel güvenlikli cam ve profi l sistemi ile kilitsiz güvenlik sağlar.

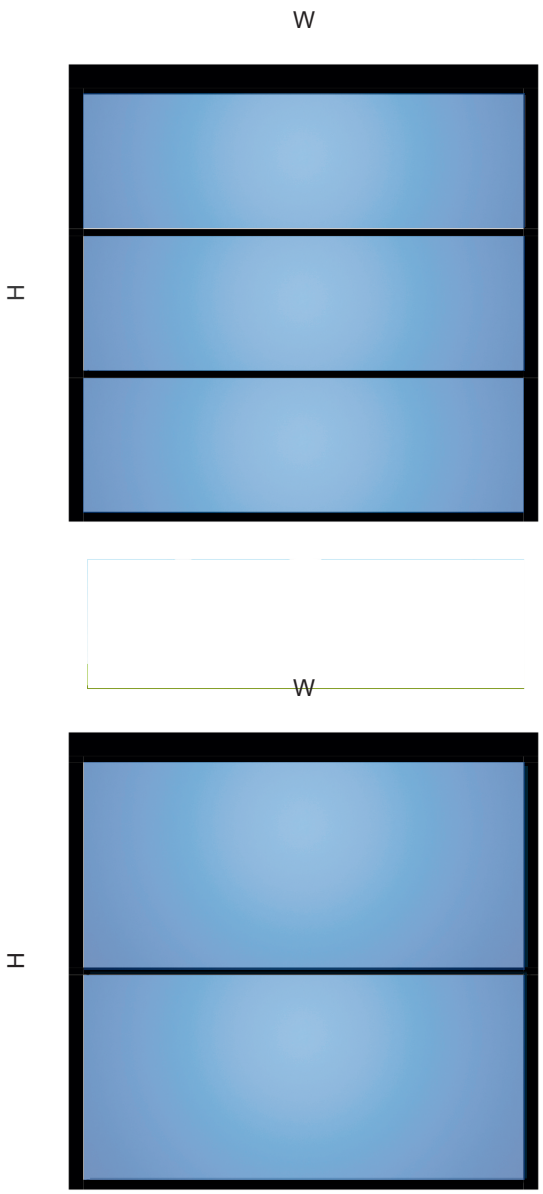

DESIGN AND FUNCTIONALITY

- Kaiser Grand Guillotine Glass Systems provide panoramic viewing angles and natural lighting with the penetration of daylight, by moving the 8mm tempered (break-resistant) or insulating glass panels up/down with the help of a motor.
- The guillotine system engine using RTS technology works with the remote control and the motion can be stopped at the specifi ed point thanks to the start-stop technology.
- The entire system or a single module can be operated with a remote control.
- Glass profi les, which minimally affect the aesthetics and fi eld of view, do not obstruct the users' fi eld of view and provide a perfect integrity with the outdoor environment with unlimited color, wood coating and pattern options.
- Rain and wind sensors that can be added to the system detect situations such as precipitation and storms when the system is on and turn off automatically.
- Guillotine systems provide 60% sound insulation. With synergy and comfort glasses that can be used in double-glazed systems, the thermal insulation feature can be increased to even higher levels.
- It works in harmony with smart home systems.
- Our guillotine systems; sound insulation, wind resistance and waterproofi ng tests have been carried out by independent institutions and have certifi cates in European standards. The insulating glass system has higher energy savings, wind resistance and water tightness than 8mm standard glass.
- The transom glass option provides the opportunity to clean the glass panels from the outside on high fl oors. In addition, when the system is off, the tilt wing can be opened and the environment can be ventilated.

SECURITY

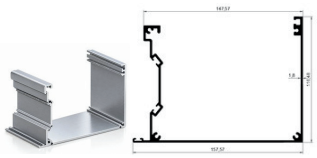

- Fingers are prevented from being caught between the glass panels while the system is being shut down. By adjusting it so that there is a gap of 1-2 cm between the moving glass and the fi xed glass, the danger of fi nger jamming is prevented even in the parking position.
- Steel chain guillotine (optional) system provides more security than other models.
- In terraces, the guillotine system acts as a 100% safe glass railing during assembly as well as the window feature.
- It provides unlocked security with its special security glass and profi le system.

STAR PLUS SİSTEM KESİT DETAYI

STAR PLUS SYSTEM CROSS-SECTION DETAIL

KATLANIR CAM BALKON
FOLDING GLASS
BALCONY

TASARIM VE FONKSİYONELLİK

- Katlanır Cam Balkon Sistemlerimiz, 8mm temperli (kırılmaya dayanıklı) cam veya 4+22+4 mm ısıcam kanatlar katlanarak açılıp kapanmasıyla, engelsiz panoramik görüş açısı ve maksimum gün ışığından faydalanarak doğal aydınlatma sağlar. Kullanılan kaliteli aksesuarlar sayesinde sessiz ve zahmetsiz bir işleyiş sunar.
- Katlanır sistem, istenilen açıklık oranında rahatlıkla kullanılabilir. Tüm kanatları tek bir noktada toplanarak alanı tamamen açabileceğiniz gibi, tek bir kanadı da pratik şekilde üstten açarak kontrollü havalandırma imkanı elde edebilirsiniz.
- Estetiği ve görüş alanını minimum oranda etkileyen özel tasarım cam profilleri, kullanıcıların manzarasını engellemez. Sınırsız renk seçenekleri ile mevcut mimariye ve dış ortama kusursuz bir bütünlük sağlar.
- Isıcam seçeneği ile donatılan sistemlerde, dilediğiniz kanada üst açılır vasistas sistemi ekleyebiliriz. Bu özellik, sistem tamamen kapalıyken dahi üst kısımdan havalandırma yapmanıza olanak tanır. Vasistas kanatlarda, sağ ve sol tarafta makas bulunmaktadır. Vasistas kanadı açmak için kullanılan çocuk kilidi özellikli kollar kullanılmakta olup, hem kolay açılıp kapanma hem de güvenli havalandırma sağlar.
- Yağmur ve rüzgâr gibi dış etkenlere karşı dayanıklı profiller ile tasarlanan sistemimiz, uzun ömürlü kullanım ve minimum bakım gerektirir.

GÜVENLİK

- Katlanır sistemde paneller arasındaki hassas mesafe ayarı sayesinde, açma-kapama sırasında parmak sıkışması riski önlenmiştir. Kanatlar, istenilen her pozisyonda emniyetli bir şekilde sabitlenebilir.
- Makas sistemli çocuk kilidi olan kollar, özellikle vasistas kanatlarda ekstra güvenlik sağlar. Bu kilit, çocukların kanadı istemsizce açmasını engellerken, yetişkinlerin tek hamlede kontrolü ele almasına imkan tanır.
- Teras ve balkon uygulamalarında katlanır sistem, pencere özelliğinin yanı sıra tüm paneller kapalıyken %100 emniyetli cam korkuluk görevi de görür. Bu sayede hem yüksek katlarda hem de açık alanlarda güvenlikten ödün vermezsiniz. Özel güvenlikli cam ve profil sistemi ile kilit mekanizmasına ihtiyaç duymadan, üstün bir güvenlik seviyesi sağlanır.
- Sistem kapalıyken dışarıdan müdahaleye karşı dirençli olup, içerideki kullanıcılara tam koruma sunar.

DESIGN & FUNCTIONALITY

- Our Folding Glass Balcony Systems feature 8mm tempered (break-resistant) glass or 4+22+4 mm insulated glass units that open and close by folding, providing an unobstructed panoramic view and maximizing natural daylight for bright, inviting spaces. Thanks to high-quality hardware components, the system operates quietly and effortlessly.
- The folding system can be comfortably adjusted to any desired opening ratio. You can gather all panels at a single point to completely open up the area, or conveniently open a single panel from the top for controlled ventilation.
- Specially designed glass profiles, which minimally impact aesthetics and visibility, do not obstruct the user's view. With an unlimited range of color options, the system blends seamlessly with existing architecture and the outdoor environment.
- For systems equipped with insulated glass, we can add a top-hinged awning window (vasista) to any panel you choose. This feature allows ventilation from the upper section even when the system is fully closed. The awning panels are fitted with scissors mechanisms on the right and left sides, and are operated using child-safety lock handles, ensuring both easy opening/closing and secure ventilation.
- Our systems are designed with profiles that are resistant to external factors such as rain and wind, offering long-lasting durability and requiring minimal maintenance.

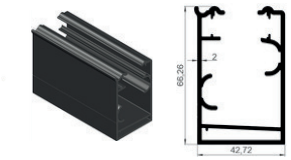

SAFETY

- Thanks to the precise gap adjustment between panels in the folding system, the risk of finger trapping during opening and closing is effectively prevented. Panels can be securely locked at any desired position.
- The scissor-type child safety lock handles provide an extra layer of security, particularly on awning panels. This locking mechanism prevents children from unintentionally opening the panel, while allowing adults to operate it smoothly with a single motion.
- In terrace and balcony applications, the folding system not only functions as a window but also serves as a 100% safe glass balustrade when all panels are closed. This ensures you never compromise on safety, whether on high floors or in open areas.
- With its specially designed safety glass and profile system, it delivers a superior level of security without the need for traditional locking mechanisms. When the system is closed, it is resistant to external intrusion and provides full protection for the users inside.

KATLANIR CAM BALKON SİSTEM KESİTLERİ FOLDING GLASS BALCONY SYSTEM CROSS-SECTION DETAIL

KAİSER PRO SÜRME

KAISER PRO SLIDING

Zerafetin ve Dayanıklılığın Buluştuğu Nokta

Kaiser Pro Sürme Cam Sistemleri

Kaiser Pro, yatay raylar üzerinde pürüzsüzce hareket eden kayar kanat yapısıyla tasarlanmıştır. Proje ölçülerine ve sistem uzunluğuna bağlı olarak 2'li veya 3'lü ray seçenekleriyle üretilebilmektedir.

Öne Çıkan Özellikler:

Jaluzi Entegrasyonu: Sistemde kullanılan 4+22+4 mm kalınlığındaki ısıcam yapısı, cam arasına konforlu bir şekilde jaluzi eklenmesine olanak tanır.

Gelişmiş Su Tahliyesi: Alt raya entegre edilmiş özel drenaj kanalları sayesinde, kar ve yağmur suları sistem dışına kolayca tahliye edilir.

Yüksek Taşıma Kapasitesi ve Geniş Kanat Ölçüleri: Cam panellerin rahatlça hareket edebilmesi için yükseklik ayarlı çift teker takımı (her takımda 4 olmak üzere toplam 9 rulman) kullanılır. Bu güçlü rulman yapısı sayesinde, 2500 mm kanat genişliği ve 3500 mm kanat yüksekliğine kadar geniş ve ferah paneller güvenle üretillebilmektedir.

Kaiser Pro Sliding Glass Systems

Kaiser Pro features sliding panels that glide smoothly along horizontal tracks. Depending on the system length and architectural requirements, it can be manufactured with double or triple track options.

Key Features:

Integrated Blinds: Thanks to the use of highly insulated 4+22+4 mm double glazing, built-in Venetian blinds can be seamlessly integrated between the glass panes.

Advanced Water Drainage: Built-in drainage channels integrated into the bottom track ensure effortless evacuation of rainwater and snow.

High Load Capacity & Large Panel Dimensions: For effortless operation, each panel is equipped with two height-adjustable roller sets (featuring a total of 8 bearings, 4 per set). This robust mechanism allows for the production of expansive glass views with a maximum panel width of 2500 mm and a panel height of 3500 mm.

Kaiser Pro Sürme Sistemleri ile Kesintisiz Panoramik Görünüm

Seamless Panoramic View with Kaiser Pro Sliding Systems

Kaiser Grand Slide Pro serisi, modern mimarı ve fonksiyonelliği bir araya getirir. 3500 mm yüksekliğe ve 2500 mm kanat genişliğine ulaşan seçenekler ile mekanlarınıza değer katar. Yüksek sıcaklık değerleri ve elektrostatik toz boya kaplaması ile uzun ömürlü kullanım sunar.

The Kaiser Grand Slide Pro series combines modern architecture with functionality. With options reaching 3500 mm in height and 2500 mm in sash width, it adds value to your spaces. High temperature performance and electrostatic powder coating support long-lasting use.

Zerafetin ve Dayanıklılığın Buluştuğu Nokta

Kaiser Grand Mimari Sistemleri ; otel, kafe, restoran, villa, konut, teras, kış/yaz bahçesi, alışveriş merkezleri gibi mekanlarda bölmeler oluşturmak ve büyük alanları bölmek için geliştirilmiştir. Pergola, bioklimatik ve cam tavan ile birlikte kullanımı sayesinde dört mevsim yaşam alanının oluşturabilirsiniz.

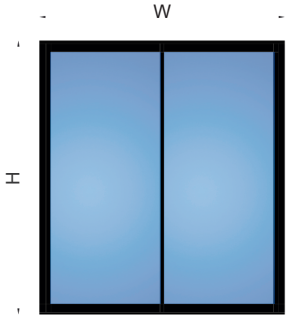

TASARIM VE FONKSİYONELLİK

- Kaiser Grand sürme cam sistemleri, yatay doğrultuda raylar üzerinde hareket eden kanatlardan oluşmaktadır. Sistem uzunluğuna göre 3'lü veya 4'lü ray detaylarına göre üretilmektedir.
- 8mm temperli cam veya 4+12+4 ısıcam kullanılmaktadır.
- Sistemin alt rayına entegre edilmiş drenaj kanalları sayesinde, kar veya yağmur suyu kolaylıkla tahliye edilebilmektedir.
- Sistemdeki cam panellerin kolay hareket etmesi için rulmanlı ve yükseklik ayarı yapılabilen iki adet teker takımı kullanılmaktadır. Kaiser Grand Sliding Glass Systems has been developed to create partitions and divide large areas in places such as hotels, cafes, restaurants, villas, residences, terraces, winter/summer gardens,
- shopping centers. You can create a four-season living space with the use of pergola, bioclimatic and glass ceiling.
-

DESIGN AND FUNCTIONALITY

- Kaiser Grand sliding glass systems consist of wings that move on rails in the horizontal direction. It is produced according to the length of the system, according to the details of 3 or 4 tracks.
- 8mm tempered glass or 4+12+4 double glass is used.
- Snow or rain water can be easily discharged with the drainage channels integrated into the bottom rail of the system.
- İn order for the glass panels in the system to move easily, two wheel sets with ball bearings and height adjustment are used.

KAISER
GRAND

CAM ÇATI (KIŞ BAHÇESİ)
WINTER GARDEN

Kaiser Grand Cam Tavan Sistemleri; otel, kafe, restoran, villa, konut, teras, kış/yaz bahçesi, alışveriş merkezleri ve havuz gibi mekanlarda gün ışığından dört mevsim yararlanmak ve gökyüzü ile aranızdaki engeli ortadan kaldırmak için geliştirilmiştir. Cam tavan ile kışın yağmur, kar ve soğuk havayı dışarıda bırakabilir, yaz aylarında ise güneşin tadını doyasıya çıkartabilirsiniz. Ayrıca giyotin, zip perde ve sürme cam sistemleri ile birlikte montaj imkanı vardır.

TASARIM VE FONKSİYONELLİK

- Cam tavam sistemi için temperli (kırılmaya dayanıklı), ısıcam, lamine ve fi berglass cam seçenekleri bulunmaktadır.
- Led ve şerit aydınlatma sayesinde 7/24 kullanım alanı oluşturur.
- Drenaj sisteminin hem kirişler hem de sütunlar içerisine entegre olan gizli kısmı, yağmur ve kar suyunun tahliye edilmesini mümkün kılmaktadır.
- Kaiser Grand Glass Ceiling Systems have been developed to take advantage of daylight in all four seasons and to remove the obstacle between you and the sky in places such as hotels, cafes, restaurants, villas, residences, terraces, winter/
- summer gardens, shopping centers and pools. With the glass roof, you can leave out rain, snow and cold weather
- in winter and enjoy the sun in summer. In addition, it is possible to install with guillotine, zip curtain and sliding glass
- systems.

DESIGN AND FUNCTIONALITY

Tempered (break resistant), double glazing, laminated and fi berglass glass options are available for the glass ceiling system.
It creates a 24/7 usage area with LED and strip lighting.
The hidden part of the drainage system, which is integrated into both beams and columns, makes it possible to drain rain and snow water.

B KESİTİ

BİO ROOF
ROLLING ROOF

BİO ROOF

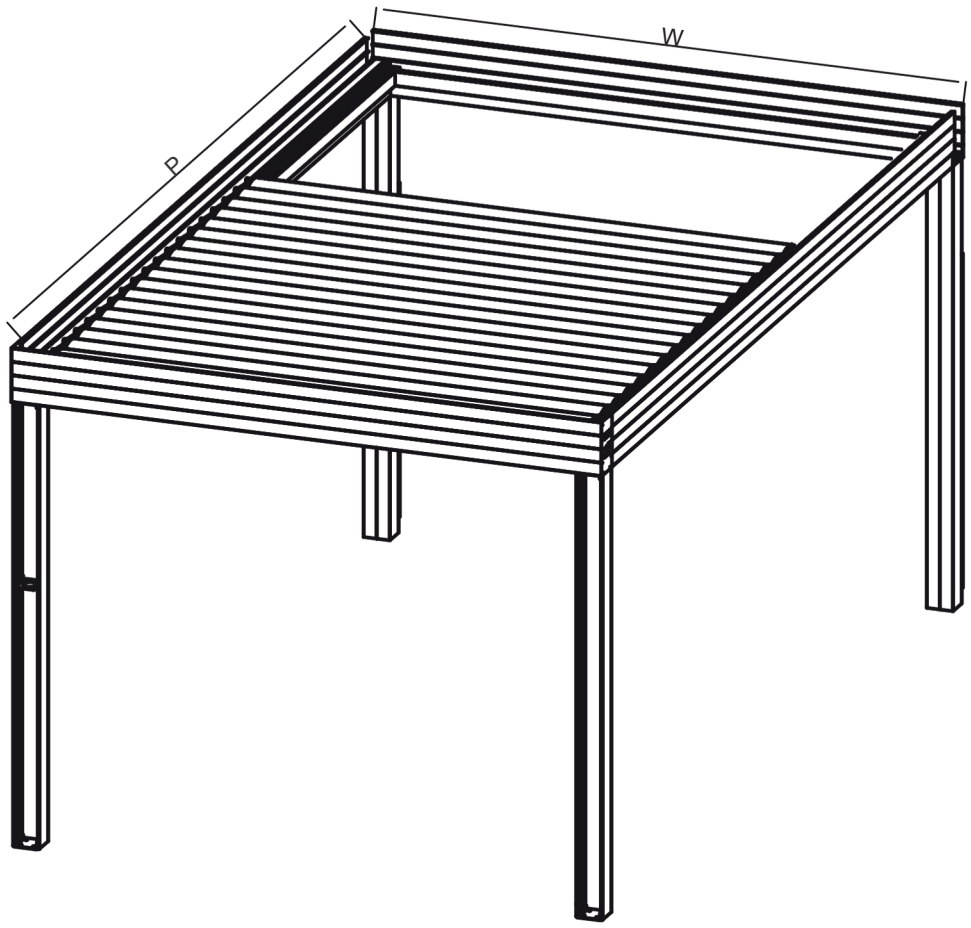

Kaiser Grand Bioklimatik Sistemleri; gelişmiş teknolojisi ve katlanma-toplanma özelliğini ile otel, kafe, restaurant, konut, teras, kış/yaz bahçesi, alışveriş merkezleri gibi yaşam alanlarını daha konforlu ve vazgeçilmez hale getirir. Giyotin, zip perde ve sürme cam sistemleri ile birlikte montaj imkanı vardır.

TASARIM VE FONKSİYONELLİK

- Bioklimatik sistemde; tavan kapanma malzemeleri olarak kullanılan paneller, kendi ekseni etrafında dönerek katlanma hareketini gerçekleştirir. Katlanma hareketini tamamladıktan sonra alüminyum paneller geriye doğru toplanarak tam bir açık tavan alanı elde edilir. Panellerin yaptığı katlanma hareketi sayesinde, çatıdan havalandırma yaparken gölgelendirme özelliğini kaybetmez.
- Açılır tavan sistemi su tahliye mantığı ile çalışmaktadır. Alüminyum paneller üzerine gelen kar/yağmur suyu,
- paneller üzerinde bulunan ark sayesinde ana ark profi line aktarılmakta ve ana ark profi linden dış alana tahliyesi
- sağlanmaktadır.
- Yağışlı havalarda, paneller belli bir açıda ayarlanarak, yaşam alanının havalandırması sağlanırken su girişini engelleyecek şekilde tasarlanmıştır.
- Opsiyonel olarak panel içlerine poliüreten köpük uygulanarak, yalıtım özelliği daha üst seviyelere çıkarılabilir.
- RTS teknolojisi kullanan giyotin sistem motoru uzaktan kumanda ile çalışır ve start-stop teknolojisi sayesinde hareket istenildiği noktada durdurulabilir. Sistemin tamamı veya tek bir modülü uzaktan kumanda ile çalıştırılabilir.
- Sisteme eklenebilen yağmur ve rüzgâr sensörleri, sistem açık durumdayken yağış ve fırtına gibi durumları algılar ve otomatik kapanır.
- Kaiser Grand Bioclimatic Systems makes living spaces such as hotels, cafes, restaurants, residences, terraces, winter/ summer gardens, shopping centers more comfortable and indispensable with its advanced technology and folding- collecting feature. It is possible to assemble with guillotine, zip curtain and sliding glass systems.

DESIGN AND FUNCTIONALITY

- The panels, which are used as ceiling closing materials in the bioclimatic system, rotate around their own axis
- and perform the folding movement. After completing the folding motion, the aluminum panels are folded back to create a full open ceiling area. With the folding movement of the panels, it does not lose its shading feature while ventilating from the roof.
- Snow/rain water collected on aluminum panels is transferred to the main arc profi le with the arc on the panels.
- Rain water is discharged from the main arc profi le to the outside.
- In rainy weather, the panels are adjusted at a certain angle and designed to prevent water ingress while providing ventilation of the living space.
- The insulation feature can be increased to higher levels by fi lling the panel with polyurethane foam (optional).
- The bioklimatic system engine using RTS technology works with a remote control and the motion can be stopped
- at any point thanks to the start-stop technology. The entire system or a single module can be operated with a remote control.
- Rain and wind sensors that can be added to the system detect situations such as precipitation and storms when the system is on and turn off automatically.

RÜZGAR KIRICI
WIND BREAKER

RÜZGAR KIRICI / WİND BREAKER

Kaiser Grand Rüzgâr Kırıcı Sistemleri, otel, kafe, restoran, konut, teras, alışveriş merkezleri gibi mekânlarda rüzgârın olumsuz etkilerinden korunmanızı sağlayarak yaşam alanlarını daha konforlu ve vazgeçilmez hale getirir. Rüzgar Kırıcı Sistem; rüzgârlı havalarda hava akışını oturum seviyesinden yukarıya taşıyarak rüzgarın olumsuz etkilerini azaltır.Hareketli cam panel yer seviyesinden 180 cm yüksekliğe kadar rüzgârdan korur.
Sistem manuel olarak kullanıma uygundur. Ağırlık dengeleme sistemi sayesinde yükseklik ayarı kolaylıkla yapılabilmektedir.

Rüzgâr Kırıcı, tek başına kullanılabildiği gibi yan yana getirilerek de kullanılabilir ve açık alanlarda seperatör görevini üstlenir. Kafe ve restoran gibi işletmelerde masa arasında kullanılan Rüzkar Kırıcı, COVID-19'un bulaşma
etkisini azaltabilir.

Kaiser Grand Wind Breaker Systems make living spaces more comfortable and indispensable by protecting you from the negative effects of wind in places such as hotels, cafes, restaurants, residences, terraces and shopping centers. The Wind Breaker System reduces the negative effects of the wind by moving the air fl ow above the session level in windy weather.

The movable glass panel protects from the wind up to 180 cm above ground level.
The system is suitable for manual use. Height adjustment can be made easily with the weight balancing system.
The Wind Breaker can be used alone or side by side and acts as a separator in open areas. The Wind Breaker, which is used between the tables in businesses such as cafes and restaurants, can reduce the contagion effect of
COVID-19.

PERGOLA SİSTEMLERİ
PERGOLA SYSTEMS

KAISER GRAND

Meşe ağacından esinlenerek özel olarak tasarlanmış olan Kaiser Grand Pergola Sistemleri; gelişmiş teknolojisi ve fonksiyonel özellikleri ile otel, cafe, restaurant, konut, teras, kış/yaz bahçesi, alışveriş merkezleri gibi yaşam alanlarını daha konforlu ve vazgeçilmez hale getirir. Giyotin, zip perde ve sürme cam sistemleri ile birlikte montajı yapılarak doğanın olumsuz yönlerini değil, sadece güzelliklerini yaşatır.

- **TASARIM VE FONKSİYONELLİK**
- KaiserGrandPergolaSistemleri; alüminyum taşıyıcılar üzerine adapte edilmiş, özel tasarım kumaşlarla tasarlanmış açılır & kapanır bir sistemdir.
- RTS teknolojisi kullanan pergola sistem motoru, uzaktan kumanda ile çalışır ve start-stop teknolojisi sayesinde hareket istenildiği noktada durdurulabilir.
- Sistemin tamamı veya tek bir modülü uzaktan kumanda ile çalıştırılabilir.
- Sisteme eklenebilen yağmur ve rüzgâr sensörleri, sistem açık durumdayken yağış ve fırtına gibi durumları algılar ve otomatik kapanır.
- Led ve şerit aydınlatma sayesinde 7/24 kullanım alanı oluşturur.
- Drenaj sisteminin hem kirişler hem de sütunlar içerisine entegre olan gizli kısmı, yağmur ve kar suyunun tahliye edilmesini mümkün kılmaktadır.

DESIGN AND FUNCTIONALITY

- Kaiser Grand Pergola Systems is an opening & closing system designed with specially designed fabrics, adapted on aluminum carriers.
- Kaiser Grand Pergola Systems, specially designed with inspiration from oak wood; with its advanced technology and functional features, it makes living spaces such as hotels, cafes, restaurants, residences, terraces, winter/summer gardens, shopping centers more comfortable and indispensable. Experience only the beauties of nature, not the negative aspects, by installing it together with guillotine, zip curtain and sliding glass systems.
- The pergola system engine using RTS technology works with a remote control and the movement can be stopped at any point thanks to the start-stop technology. • The entire system or a single module can be operated with a remote control.
- With rain and wind sensors that can be added to the system, the system detects rain and storm conditions when it is on and turns off automatically. • It creates a 24/7 usage area with LED lighting.
- The hidden part of the drainage system, which is integrated into both beams and columns, makes it possible to evacuate rain and water.

ZİP PERDE
ZIP SCREEN

ZİP PERDE / ZIP SCREEN

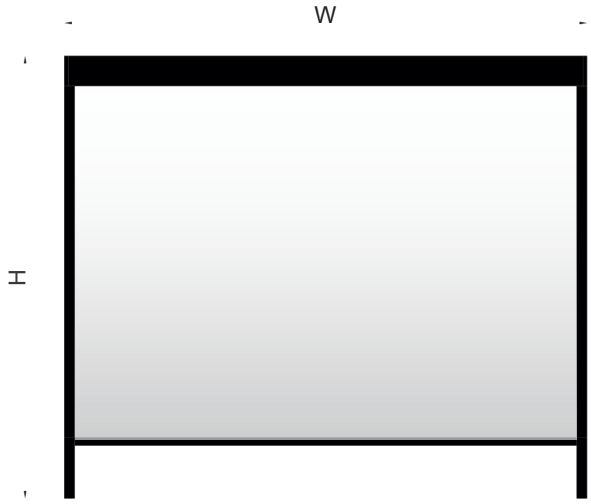

Kaiser Grand Zip Perde; otel, kafe, restoran, villa, konut, teras, kış/yaz bahçesi, alışveriş merkezleri gibi mekanlarda güneş ve rüzgarın olumsuz etkilerinden korunmak, yaşam alanlarını daha konforlu ve vazgeçilmez hale getirmek için geliştirilmiştir.

TASARIM VE FONKSİYONELLİK

- Zip Perde için mikro havalandırma gözenekleri ile özel olarak tasarlanmış kumaşlar kullanılır. Alüminyum profiller sayesinde gergin duran kumaşlar dışarıdaki soğuk veya sıcak havanın yaşam alanının girmesini engeller. Perde kapalı olmasına rağmen yaşam alanın görüş açısı kapanmaz.
- RTS teknolojisi kullanan zip perde motoru uzaktan kumanda ile çalışır ve start-stop teknolojisi sayesinde hareket istenildiği noktada durdurulabilir. Motor modülünün ses izolasyonu sayesinde sessiz çalışır
- Sistemin tamamını veya tek bir modülü uzaktan kumanda ile çalıştırılabilir.
- Sistemde Serge Ferrari ve Screen kumaşlar kullanılmaktadır. Ayrıca zip perde kumaşına fi rmalara özel logo, marka baskısı yapılabilmektedir.

DESIGN AND FUNCTIONALITY

- Specially designed fabrics with micro-ventilation pores are used in Zip Curtain. Stretch fabrics with aluminum profi les prevent the cold or hot air from entering the living space. Although the curtain is closed, the viewing angle of the living area does not close.
- The zip curtain motor using RTS technology works with a remote control and the motion can be stopped at any point thanks to the start-stop technology. It works silently thanks to the sound insulation of the motor module.
- The entire system or a single module can be operated with a remote control.
- Serge Ferrari and Screen fabrics are used in the system. In addition, company-specifi c logo and brand printing can be made on zip curtain fabric.
- Kaiser Grand Zip Curtain has been developed to protect from the negative effects of sun and wind in places such as hotels, cafes, restaurants, villas, residences, terraces, winter/summer gardens, shopping centers, and to make living spaces more comfortable and indispensable.

Bahçeçit sistemleri;güvenlik, mahremiyetvemodernmimarigörünümübir araya getirerek villa, müstakil ev, site ve ticari alanların çevresinde estetik bir sınır oluşturur. Dayanıklı alüminyum paneller, güçlü taşıyıcı dikmeler ve dış ortam koşullarına uygun bağlantı elemanları sayesinde uzun ömürlü kullanım sunar. Projeye göre yatay veya dikey lamel, farklı panel aralıkları, yükseklikler ve renk seçenekleri uygulanabilir.

- Sağlam ve uzun ömürlü yapı
- Farklı panel, lamel ve desen seçenekleri
- Dayanıklı alüminyum panel ve dikmeler
- Mimariye uygun panel ve profil renkleri

Akıllı gölgeleme,
kontrollü gün ışığı.

WİNTEND SİSTEMLERİ / WINTEND SYSTEMS

Pencere, balkon, mağaza vitrini,kafe,restoranveticari alanlardagüneş ışığını kontrollü biçimde yöneten motorlu Wintend sistemleriyle estetik ve konforlu gölgelendirme oluşturun.
Wintend sistemleri, motorlu veya manuel kasetli tente yapısı sayesinde güneş ışığını kontrollü biçimde keser; pencere, balkon, vitrin, kafe ve restoran cephelerinde konforlu gölgelendirme sağlar.

- Sessiz ve güçlü motor
- Yaylı özel kollarla gergin kumaş
- Dayanıklı alüminyum kaset ve kollar
- Mimariye uygun profil ve kumaş renkleri

Sadece sistem değil,**yaşam alanı tasarlıyoruz.**
